

Newsletter: X-431 PRO series (X-431 Pro and X-431 Pro3) M2-4

The LAUNCH X-431 PRO series is a new advanced automobile diagnostic solutions based on Android tablet. The new highlight is remote diagnosis (with golo) and built-in social network service (SNS), which creates a new mobile internet platform environment to connect vehicles and workshops. Also, it can realize all the diagnostic functions of X431 series which includes reading DTCs, clearing DTCs, reading data stream, actuation test and more special features, and covers American, Asian und European cars.

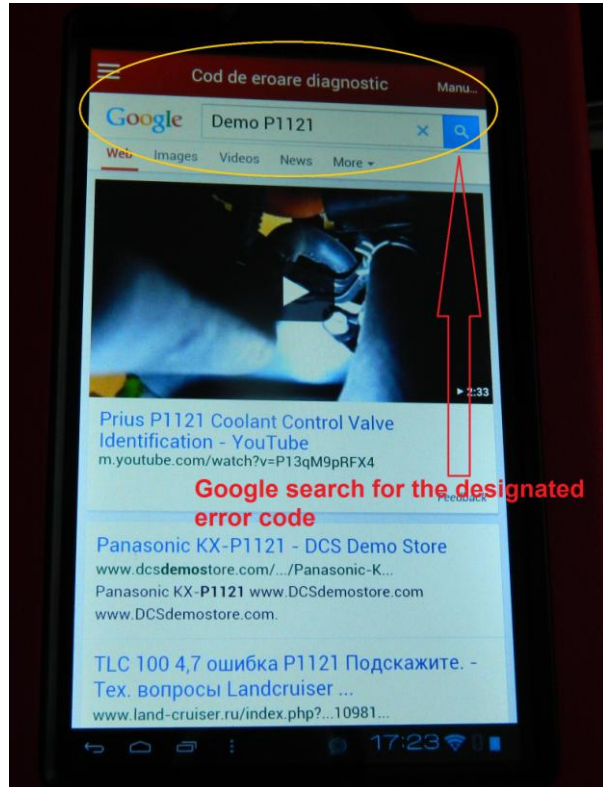

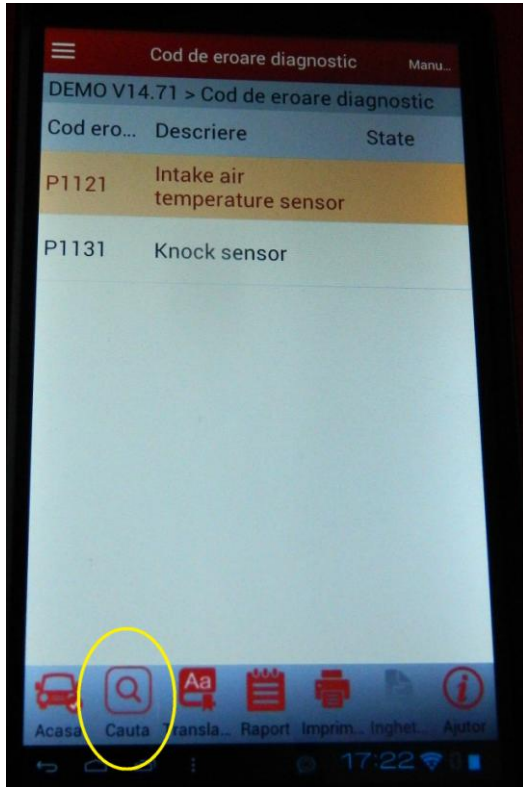

News:

1. **GOOGLE translation function:** now you can enjoy the benefits of direct translation into your native language of the error code wanted (Wi-Fi connection needed)

LAUNCH

2. **Google search function:** you have the possibility to search directly from your Pro the information Google is displaying about the particular error code you are interested in

3. **INDEPENDENT "BUTTONS"** for brake reset, oil reset, steering angle sensor (SAS) reset (in this way, the access to these commonly used functions will be much more easy)
